

Purpose of AI Use: formatting the information that needed to be listed on a README file in a proper format.

Chat Link or Prompt/Response: <https://claude.ai/share/ddcc3e6f-d4c9-499c-9ae4-c9e8317b7cf7>

AI-Suggested Content: Generated a README file from the information provided.

Validation: Compared the suggestions against project requirements and reviewed them during the team meeting.

Decision: Modified and partially accepted.

Reflection: AI took my requirements and formatted it in an appropriate way for a README file and saved me time because of that. However, it missed a couple details such as the group members' names and so it needed review and it needed additional changes to comply with the readme file structure of this course.
